Agent reasoning

Agent	Reasoning
Relevance judge	The response addresses 100% of what the question asks about (semantic similarity 0.88, combined relevance signal 0.96), which falls in the 'Completely relevant' band. This judge measures only whether the question was addressed; factual correctness is evaluated separately by the Accuracy Judge.
Accuracy judge	Checked 1 claim(s) against the retrieved evidence: 1 confirmed by the retrieved evidence. Verdict: Completely correct.
Completeness judge	Identified 1 requirement(s) in the question: 1 addressed, 0 partially addressed, 0 missing. Verdict: Completely complete.
Hallucination detector	Extracted 1 claim(s) from the response and checked each against the available evidence: 1 supported, 0 unsupported, 0 contradicted. Overall status: No hallucination. Unsupported claims are unverified by this evidence, not proven false.
Verdict agent	Weighted overall score 100.00/100 (accuracy 100, hallucination 100, completeness 100, relevance 100; weights 35/30/20/15) maps to a base verdict of 'Pass'. Final verdict: 'Pass'. No major issues identified across any of the four judges.
